Oliver Taylor

oliver.taylor@example.com | (512) 555-0196

Objective

Data Scientist who pairs SQL and Python with statistical rigor to find and explain patterns in messy, real-world data.

Employment

Senior Data Scientist, Verdant Agritech
06/2018 - Present
- Used Pandas and NumPy to clean and transform multi-source data before modeling.
- Built dashboards summarizing key metrics for the leadership team.
- Built Scikit-learn models to predict customer churn, presenting findings with clear statistics to non-technical stakeholders.
- Designed controlled experiments to compare product variants and measured the impact on conversion before any change shipped broadly.

Data Scientist, Westbridge Capital
03/2016 - 07/2018
- Designed controlled experiments to compare product variants and measured the impact on conversion before any change shipped broadly.
- Used Pandas and NumPy to clean and transform multi-source data before modeling.
- Built Scikit-learn models to predict customer churn, presenting findings with clear statistics to non-technical stakeholders.

Education

M.S. in Data Science, Hamilton Institute of Technology

Core Competencies

Python, SQL, Pandas, NumPy, Scikit-learn, Statistics, Machine Learning

Certifications

- Microsoft Certified: Azure Data Scientist Associate
- Google Data Analytics Certificate
