Profile

Python Backend Engineer building Python services with FastAPI and Django, backed by PostgreSQL and shipped in Docker containers.

Professional Experience:

Backend Engineer, Quantum Byte
Oct 2024 - Present
- Wrote integration tests covering the most critical API endpoints.
- Split a monolithic application into independently deployable services that scaled under load without a full rewrite.
- Containerized services with Docker and wrote the Git branching workflow the team still uses.

Junior Backend Engineer, Skyline Mobility
Oct 2022 - Oct 2024
- Cached expensive query results in Redis to cut p95 latency by half.
- Split a monolithic application into independently deployable services that scaled under load without a full rewrite.
- Containerized services with Docker and wrote the Git branching workflow the team still uses.

EDUCATION

M.S. in Computer Science, Pinecrest College

Technical Skills: Python, FastAPI, Django, PostgreSQL, Docker, Git

Certifications

- AWS Certified Developer - Associate
