Summary

Python Backend Engineer building Python services with FastAPI and Django, backed by PostgreSQL and shipped in Docker containers.

Work History

Junior Backend Engineer, Riverton Logistics
2024-Present
- Designed PostgreSQL schemas and wrote migrations for a growing Django monolith.
- Built and maintained REST endpoints in FastAPI serving millions of requests per day.
- Wrote integration tests covering the most critical API endpoints.

Education

B.S. in Software Engineering, State University

Technical Skills

Python, FastAPI, Django, PostgreSQL, Docker, Git

Projects

- Rebuilt a billing service in FastAPI with a PostgreSQL-backed ledger.
- Introduced Docker Compose for local development, cutting onboarding time from a day to an hour.
