Profile

Data Analyst turning SQL queries and Excel models into clear, actionable reporting.

Professional Experience:

Senior Data Analyst, Clearcut Media
06/2021 - Present
- Used Python and Statistics to test whether a marketing change actually moved the metrics it targeted.
- Published a Power BI dashboard tracking support-ticket volume by region.
- Wrote SQL queries joining five source tables into a single weekly sales report.
- Built repeatable transformation pipelines that turned raw tables into trusted, reporting-ready datasets without a single manual export.

Data Analyst, Quantum Byte
02/2019 - 06/2021
- Built repeatable transformation pipelines that turned raw tables into trusted, reporting-ready datasets without a single manual export.
- Wrote SQL queries joining five source tables into a single weekly sales report.
- Published a Power BI dashboard tracking support-ticket volume by region.

Education

B.S. in Business Analytics, Riverstone College

Technical Skills

SQL, Excel, Tableau, Python, Statistics

Projects

- Built a Tableau dashboard that replaced a weekly manual Excel report.
- Wrote a SQL-based cohort report that is still used to track retention.
