Objective

ML Engineer with 1+ years building and shipping machine learning systems in Python, from research prototypes through production deployment.

EXPERIENCE

Junior ML Engineer, Fern Analytics
2024-Present
- Built systems that let machines interpret and classify photographs for a quality-inspection product.
- Deployed TensorFlow models to production behind a REST API with automated retraining on a schedule.
- Tracked experiments and model versions with MLflow across a team of four engineers.

EDUCATION

M.S. in Machine Learning, Westlake University

Technical Skills: Python, Machine Learning, Deep Learning, TensorFlow, PyTorch, Scikit-learn
