Lucas Williams

lucas.williams@example.com | (312) 555-0141

Profile

Data Scientist who pairs SQL and Python with statistical rigor to find and explain patterns in messy, real-world data.

Professional Experience:

Senior Data Scientist, Trailhead Robotics
11/2023 - Present
- Designed controlled experiments to compare product variants and measured the impact on conversion before any change shipped broadly.
- Used Pandas and NumPy to clean and transform multi-source data before modeling.
- Built Scikit-learn models to predict customer churn, presenting findings with clear statistics to non-technical stakeholders.

Data Scientist, Fern Analytics
09/2018 - 11/2023
- Queried and joined large SQL tables to build analysis-ready datasets for weekly business reviews.
- Used Pandas and NumPy to clean and transform multi-source data before modeling.
- Designed controlled experiments to compare product variants and measured the impact on conversion before any change shipped broadly.

Junior Data Scientist, Fathom AI
07/2016 - 09/2018
- Designed controlled experiments to compare product variants and measured the impact on conversion before any change shipped broadly.
- Used Pandas and NumPy to clean and transform multi-source data before modeling.
- Built Scikit-learn models to predict customer churn, presenting findings with clear statistics to non-technical stakeholders.

Education

M.S. in Data Science, Hamilton Institute of Technology

Core Competencies: Python, SQL, Pandas, NumPy, Scikit-learn, Statistics, Tableau

Projects

- Built a churn-prediction model in Scikit-learn and tracked its lift in a subsequent experiment.
- Ran a cohort analysis in SQL and Pandas that reshaped the onboarding roadmap.

Certifications

- Microsoft Certified: Azure Data Scientist Associate
- Google Data Analytics Certificate
