Profile

DevOps/Cloud Engineer with 3+ years running Kubernetes on AWS and codifying infrastructure in Terraform.

Work History

DevOps Engineer, Orbital Devices

06/2024 - Present

- Set up dashboards and alerts that caught production issues before customers noticed, cutting the average time to detect an outage in half.
- Built CI/CD pipelines that cut deploy time from an hour to under ten minutes.
- Wrote Terraform modules that stood up a full environment in one command.
- Administered a fleet of Linux hosts, automating patching with Ansible.

Junior DevOps Engineer, Trailhead Robotics

09/2022 - 06/2024

- Wrote Terraform modules that stood up a full environment in one command.
- Containerized a legacy application with Docker so it could run on Kubernetes.
- Set up dashboards and alerts that caught production issues before customers noticed, cutting the average time to detect an outage in half.

Education

B.S. in Information Systems, Riverstone College

Core Competencies

AWS, Docker, Kubernetes, Terraform, CI/CD, Linux, Grafana
