Priya Flores

priya.flores@example.com | (804) 555-0165

Profile

Python Backend Engineer building Python services with FastAPI and Django, backed by PostgreSQL and shipped in Docker containers.

Employment

Senior Backend Engineer, Pivotal Works
07/2021 - Present
- Containerized services with Docker and wrote the Git branching workflow the team still uses.
- Built and maintained REST endpoints in FastAPI serving millions of requests per day.
- Cached expensive query results in Redis to cut p95 latency by half.

Backend Engineer, Bluewing Media
02/2017 - 10/2021
- Split a monolithic application into independently deployable services that scaled under load without a full rewrite.
- Designed PostgreSQL schemas and wrote migrations for a growing Django monolith.
- Cached expensive query results in Redis to cut p95 latency by half.

EDUCATION

B.S. in Software Engineering, Lakeview College

Technical Skills

Python, FastAPI, Django, PostgreSQL, Docker, Git

Certifications

- AWS Certified Developer - Associate
